DIRECTED TO THE CREAM OF WISCONSIN'S DAIRYLAND

Dear Ernest

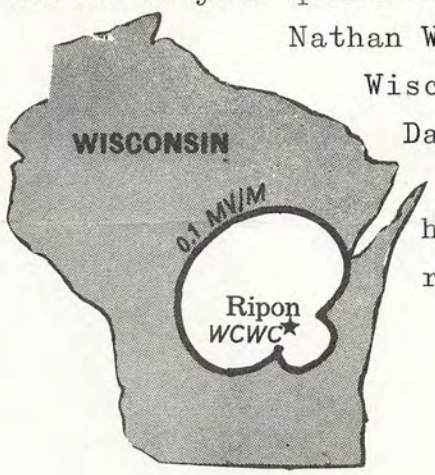
This letter is in answer to your reception report. Upon checking our log, I find that your reception report is correct. Here in brief, is a picture of our station:

LOCATION: 2.05 miles SSW of the Ripon business district.
North Lat. 43° 48' 51"
West Long. 88° 50' 47"

POWER: 5000 watts from a Gates BC-5P-2 transmitter, utilizing a directional antenna system.

ANTENNAS: Two uniform cross-section, guyed, series excited steel towers. Overall height, including insulators is 153 feet, and spaced 102 feet (or 60°) apart on a line bearing 310° true.

Let me say that I'm rather surprised to receive your reception report. In answer to your question, our frequency checks are made monthly by Nathan Williams, a consultant engineer from Oshkosh Wisconsin. If you get a chane to talk to Carl Dabelstein, ask him to send us a report and I will be happy to reply.



WCWC Radio serves rich Central Wisconsin and reaches 27 Dairy-Farming counties
